Product Description

M8 Electric Microneedling Device With 12 Needles For Skin Rejuvenation

Product Description:

The M5 model Electric Microneedle Machine is designed to provide a comfortable and pain-free experience during use. It operates at an input voltage of 110-240V and an output voltage of 5V, making it suitable for use in various countries around the world. The frequency range of 50-60Hz ensures stable and reliable performance during use.

The Electric Microneedle Machine is a versatile tool that can be used to treat a variety of skin concerns, including fine lines, wrinkles, acne scars, and hyperpigmentation. It can be used on all skin types and is safe for use on the face and body. The De Martha nine needles are made from high-quality materials and are designed to last for multiple uses.

In summary, the Electric Microneedle Machine is a must-have for anyone looking to achieve healthier, more youthful-looking skin. It is a safe and effective alternative to more invasive skin rejuvenation treatments and can be used in the comfort of your own home. Whether you're looking to improve the appearance of fine lines and wrinkles or reduce the appearance of acne scars and hyperpigmentation, the Electric Microneedle Machine is the perfect tool for the job.
