Basic Information

- Place of Origin: China Guangzhou
- Brand Name: DJM
- Certification: ISO CE HAD
- Model Number: D1
- Minimum Order Quantity: 1
- Price: confer
- Packaging Details: Standard export packing
- Delivery Time: 5-8days
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100 Piece/Pieces per Month

Product Specification

- Name: Skin Analysis Machine
- Packing Size: L68xW49xH51cm
- Computer Requirement: Windows XP/Vista/7/8/10
- Type: Portable
- Megapixel: 2000W
- Camera Sensor Model: CCD1/1.7
- Power Supply: AC 100-240V, 50/60Hz
- Magnifier: Yes
- Weight: 2.5kg
- Highlight: Digital Skin Analysis Machine 2000W , Digital Skin Analyser Machine , Resolution Face Analyzer Machine

Product Description

Resolution Facial Digital Skin Camera Microscope For Skin Types 2000W

Product Description:

The Color Temperature of the machine is 7200 K, which is the optimal color temperature for skin analysis. This ensures that the machine provides accurate and reliable results. The operating system of the machine is RGB + UV, which means that it can detect both visible and invisible skin problems. This makes it a valuable tool for diagnosing skin problems that may not be visible to the naked eye.

The Skin Analysis Machine is an essential tool for those who want to maintain healthy and beautiful skin. By analyzing the skin, the machine can identify specific skin problems and provide recommendations for customized skin care products. This means that users can receive personalized recommendations for skincare products that are tailored to their specific skin type and problems.

The Skin Analysis Machine is easy to use and provides quick and accurate results. The magnifier provides a clear view of the skin, and the machine can detect problems such as fine lines, wrinkles, hyperpigmentation, and acne. With this valuable information, users can take steps to address these issues and maintain healthy and beautiful skin.

In summary, the Skin Analysis Machine is a powerful tool for diagnosing and treating skin problems. Its 7200 K color temperature, AC 100-240V, 50/60Hz power supply, and RGB + UV operating system make it an accurate and reliable tool for analyzing skin. Its ability to detect 12 different skin problems makes it an essential tool for anyone interested in maintaining healthy skin. The Skin Analysis Machine is an invaluable resource for dermatologists, aestheticians, and anyone interested in customized skin care products.

Features:

Product Name: Facial Skin Analyzer Machine

Operating System: RGB +UV

Weight: 2.5kg

Megapixel: 2000W

Detect Problem: 12 Skin Problem Detected

Magnifier Rate: 2X

This Skin Analysis Machine is the perfect tool for analyzing your skin and detecting any problems you may have. With its RGB +UV operating system, it can accurately detect 12 skin problems, providing you with valuable information to help you customize your skin care routine. The 2X magnifier rate ensures that you can see every detail of your skin, and the 2000W megapixel ensures that you get clear and accurate readings every time. Use this Facial Skin Analyzer Machine to improve your skin health and get the best out of your Facial Skin Care Devices. Get the customized skin care products you need with this Skin Analysis Machine!

Technical Parameters:

Technical Parameters	Details
Pdf Print	YES
Detect Problem	12 Skin Problem Detected
Computer Requirement	Windows XP/Vista/7/8/10
Packing Size	L68xW49xH51cm
Working Environment	10 – 35 Celsius Degrees
Power Supply	AC 100-240V, 50/60Hz
Magnifier Rate	2 X
Usb	2.0 Port
Magnifier	Yes
Type	Portable

This DJM skin analysis machine is perfect for detecting 12 different skin problems and creating customized skin care products. It is a 3D skin analyzer with a 2X magnifier rate and a USB 2.0 port for easy connectivity. It requires Windows XP/Vista/7/8/10 and operates in a 10-35 Celsius degree working environment. The power supply is AC 100-240V, 50/60Hz. It is a portable machine with a packing size of L68xW49xH51cm.

Applications:

The Digital Skin Analyzer provides a range of benefits for those who want to improve their skin care routine. It is suitable for use in a variety of environments, including beauty salons, spas, dermatology clinics, and other professional settings. The device works by analyzing the skin's condition using RGB + UV technology, which helps to identify areas of concern such as wrinkles, dark spots, and other blemishes.

One of the key benefits of the Digital Skin Analyzer is that it provides a more accurate assessment of the skin's condition compared to

traditional methods. This is because the device uses advanced technology to provide a 3D analysis of the skin, which helps to identify even the smallest imperfections. This makes it easier for professionals to develop a personalized skin care routine that addresses the specific needs of their clients.

The Digital Skin Analyzer can be used in a variety of occasions and scenarios. For example, it is an ideal tool for those who want to monitor the progress of their skin care routine. It is also useful for individuals who want to identify potential skin issues before they become more serious. Additionally, the device is beneficial for professionals who want to offer a more comprehensive skin analysis to their clients.

In conclusion, the Digital Skin Analyzer is a versatile and essential tool for anyone who wants to improve their skin care routine. It is a portable and easy-to-use device that provides accurate and comprehensive skin analysis. Whether you are a beauty professional or an individual looking to improve your skin's health, the Digital Skin Analyzer is an excellent investment.

Customization:

Place of Origin: China Guangzhou

Camera Sensor Model: CCD1/1.7
